# KELLY BROADDUS LUXURY MARKET REPORT FLAGSTAFF | JULY 2025

## **KELLY BROADDUS**

Broker/Associate, Team Lead Broaddus Properties Group Brokered by eXp

(Office) 888.446.5602 (Direct) 928.332.3524 kelly.broaddus@exprealty.com NorthernArizonaFineHomes.com NorthernArizonaLuxuryHomes.com

Kelly Broaddus founded Broaddus Properties to enable her clients and agents to find success. With over a half-billion dollars in sales spanning over the duration of her career, and a professional career of over 23 years, it is clear she fully understands the Flagstaff/Sedona real estate market, what her clients are looking for, and the industry's potential.

Kelly was, quite literally, born into the real estate industry. Her father became a self-made millionaire by the time he was thirty and proceeded to act as Kelly's mentor as she honed her skills in real estate development, sales, and acquisitions. Growing up on a thoroughbred horse ranch in Rancho Santa Fe and spending summers at her parent's beach house in Del Mar gave Kelly the innate ability to seek and identify the characteristics that make a house a beautiful, peaceful haven to call home. Her command of the real estate industry expanded when Kelly delved into the mortgage business, becoming a widely sought-after expert in handling difficult loans, and running a mortgage company for over 12 years, where she often advised colleagues around the state. She still draws on this experience and insight to negotiate the optimal price for her clients.

In addition to hard skills, Kelly's father taught her the soft skills involved in managing relationships, delivering on expectations, and visualizing what is possible. Her undeniable work ethic and endless drive are due to the resilience she has been required to show in her personal life.

With seven children under the age of fifteen, Kelly was left a single mother and had no choice but to work hard and find substantial success in real estate. Within four years of having her life turned upside down, she was able to purchase a 300-acre ranch and achieve her dream of raising her children in the same way as she was.

Her notable achievements to date include:

- · 2018-2021 eXp Realty ICON Agent
- · 2021 Top Producing RE Team in Northern AZ, \$64,000,000 Sales Volume
- · 2020 2021 Homelight TOP PRODUCER
- · 2021 Homelight TOP NEGOTIATOR
- · 2016-2021 SEVEN STAR AWARD BROKER AGENT ADVISOR
- · 2016 RE/MAX Hall of Fame Award
- · 2016 RE/MAX Chairman's Club Award
- · CHLMS & Million Dollar Guild Member
- · Member of "Who's who in Luxury Real Estate"

#### MORE OF KELLY'S RECOGNITION & AWARDS

Today, Kelly is blessed to work with two of her children and one son-in-law as she continues to pass down the family business and the art of real estate.

# 2025 LUXURY MARKET MID-YEAR REVIEW: STRENGTH, STRATEGY & SHIFTING DYNAMICS

As we close out the first half of 2025, the luxury real estate market in North America has presented a narrative of disciplined resilience over the past six months.

While broader economic uncertainty, especially around interest rates, has created a more cautious environment, luxury real estate has proven remarkably steady, with median sold prices holding firm, inventory levels rising, and buyer behavior becoming increasingly strategic.

Now at the midpoint of the year, the market is expected to continue reflecting a balance of resilience, recalibration, and restrained momentum as both buyers and sellers navigate shifting conditions.

#### EARLY 2025: A STRONG START WITH RISING CONFIDENCE

The first quarter of 2025 began on an optimistic note. January saw a significant boost in activity, with sales of single-family luxury homes up 17.6% compared to the year prior and attached properties gaining 12.7%. Inventory surged as sellers re-entered the market, and new listings for single-family homes jumped by 33%. This influx of properties and buyer engagement signaled renewed confidence after a more restrained fourth quarter in 2024.

February continued to deliver high inventory levels, up another 24% year-over-year, but both buyers and sellers began to pull back slightly. The growth in new listings slowed to 17.9%, and single-family sales softened, increasing by just 4.5% year-over-year. Sellers began hesitating, waiting to see if interest rates might fall, while buyers started to factor financing costs and economic signals more carefully.

March brought a notable resurgence. Single-family home sales rebounded 7.3% over the previous year and rose nearly 40% compared to February, reflecting a wave of reengaged buyers. Attached inventory climbed by more than 28%, and new listings increased again.

The tone shifted back to cautious optimism, with buyers focused on long-term value, lifestyle alignment,

and location quality - often leaning into all-cash purchases or equity-based financing to move quickly in an uncertain lending environment.

#### Q2: A MARKET IN RECALIBRATION

As the second quarter unfolded, market behavior became more nuanced. In April and May, sales volumes slowed. Single-family home sales declined 2.9% year-over-year in May, while attached properties experienced a steeper 11.9% drop.

Despite these slower sales, inventory levels kept climbing. By May, total inventory for single-family homes had risen over 30% compared to the previous year, although new listings were growing more moderately. The trend was clear: sellers weren't flooding the market with new inventory; instead, existing listings were accumulating as properties took longer to sell.

In the attached segment, inventory was up 23.5% year-over-year, while new listings grew only 4%. This widening gap suggested that many homeowners were still waiting for better financial conditions before listing their properties.

#### JUNE 2025: A BALANCED BUT CAUTIOUS MARKET

June's numbers further clarified the market's mid-year stance. Sales of single-family luxury homes rose 11.0% compared to June 2024, while attached home sales ticked up just 0.6%. Buyers remained active, especially for desirable single-family homes in lifestyle-driven markets, but were no longer rushing. This

H P

pointed to a healthy but deliberate pace, with affluent clients willing to wait for the right property.

Inventory continued to exceed 2024 levels by approximately 26% for single-family homes and 20% for attached properties, providing buyers with expanded choices. However, the rate of new listings entering the market had slowed. While new listings for single-family homes were still up 12.8% and attached homes 5.3% year-over-year, both figures were nearly 20% lower than the year-over-year increases recorded in April. This tapering off highlights the ongoing hesitation from sellers, many of whom are likely holding back until interest rate cuts materialize.

Prices, meanwhile, remained steady. The median sold price for single-family luxury homes appreciated by 1.6% year-over-year in June, while attached homes saw a robust 6.4% increase. These gains reflect the underlying strength of demand, particularly for well-positioned and updated homes in high-demand regions. Despite the slower pace, buyers continue to recognize long-term value and are willing to pay a premium when they find the right fit.

One notable change has been time on market. Properties in June 2025 took roughly 23% longer to sell than they did a year ago. Buyers are moving more cautiously, and with more options available, they are taking time to compare, negotiate, and align decisions with broader financial goals. This increased deliberation is not a sign of weakness - it's a reflection of a market maturing out of the urgency that defined the post-pandemic years.

#### KEY FORCES SHAPING TODAY'S LUXURY MARKET

Several trends are driving today's luxury real estate dynamics.

First, buyer behavior has become far more strategic. Many are still purchasing, but they are doing so with a sharper focus on value, timing, and lifestyle alignment. Second, inventory has grown significantly, yet new listings are not flooding in as one might expect. Sellers, especially the aspirational wealthy rather than the ultra-high-net-worth, remain cautious watching interest rates, stock market variations and broader economic influences closely before listing.

The dominance of cash continues to reshape the luxury segment. With borrowing costs still elevated, many buyers, especially those relocating or downsizing, are transacting in cash or leveraging alternative financing strategies, such as private equity or asset-backed lines. This shift has helped insulate the high end from the financing volatility affecting other segments of the housing market.

Lastly, prices have shown notable resilience. While overall demand has softened in certain regions, median sold prices continue to reflect modest appreciation, particularly in the attached home segment. However, this upward trend is largely driven by properties that meet the expectations of today's affluent buyers: quality, uniqueness, and scarcity. Homes that don't align with these standards are facing increased downward pressure. In other words, while the median sold price is rising, it's not a universal lift - properties lacking in desirability or move-in readiness are sitting longer and often selling below list.

#### WHAT TO EXPECT FOR THE SECOND HALF OF 2025

Looking ahead, the trajectory of the luxury market will likely be shaped by interest rate policy. A meaningful rate cut could prompt a wave of new listings from sellers who have been waiting on the

sidelines, while also restoriing financing confidence for buyers who have hesitated.

That said, buyer selectiveness isn't going away. The affluent consumer in 2025 is not rushing into transactions. They are prioritizing properties that align with evolving lifestyle preferences, including wellness features, turnkey finishes, and location versatility.

Second-home markets and low-tax destinations continue to outperform urban cores, although a subtle return to city living is taking shape among Gen X and millennial luxury buyers. Others are increasingly targeting below-market homes needing renovations - a trend supported by the North American Home Builders Association, which forecasts strong remodeling growth in 2025 due to aging housing stock, high homeowner equity, and a growing preference toward upgrading over building new.

Time on market may continue to trend higher in the near term, especially if more inventory is introduced without a corresponding spike in buyer urgency. However, with pricing remaining firm and inventory growth slowing, sellers who are well-prepared and well-advised still stand to perform strongly.

#### IN CONCLUSION

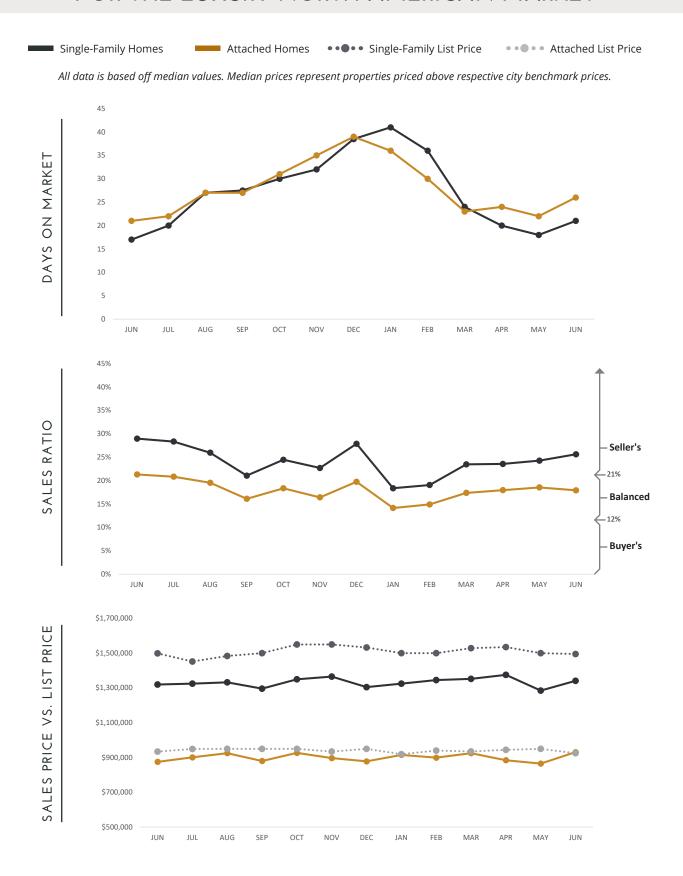

The first half of 2025 has underscored that the luxury real estate market is not cooling, it's recalibrating. Prices are holding. Inventory has grown, but not recklessly. Buyers are active but careful. Sellers are confident but cautious. Everyone is watching interest rates and monitoring the broader economic impacts, including the recent U.S. tariff implementation.

In this kind of market, preparation and strategy are everything. Whether you are considering selling a legacy property or buying in a different market, the key is using the data to help your clarity and timing. The second half of 2025 may not be a sprint, but it promises meaningful movement for those who are ready to act when the signal turns green.

## - LUXURY REPORT EXPLAINED -

The Institute for Luxury Home Marketing has analyzed a number of metrics — including sales prices, sales volumes, number of sales, sales-price-to-list-price ratios, days on market and price-per-square-foot – to provide you a comprehensive North American Luxury Market report.

Additionally, we have further examined all of the individual luxury markets to provide both an overview and an in-depth analysis - including, where data is sufficient, a breakdown by luxury single-family homes and luxury attached homes.

It is our intention to include additional luxury markets on a continual basis. If your market is not featured, please contact us so we can implement the necessary qualification process. More in-depth reports on the luxury communities in your market are available as well.

Looking through this report, you will notice three distinct market statuses, Buyer's Market, Seller's Market, and Balanced Market. A **Buyer's Market** indicates that buyers have greater control over the price point. This market type is demonstrated by a substantial number of homes on the market and few sales, suggesting demand for residential properties is slow for that market and/or price point.

By contrast, a **Seller's Market** gives sellers greater control over the price point. Typically, this means there are few homes on the market and a generous demand, causing competition between buyers who ultimately drive sales prices higher.

A **Balanced Market** indicates that neither the buyers nor the sellers control the price point at which that property will sell and that there is neither a glut nor a lack of inventory. Typically, this type of market sees a stabilization of both the list and sold price, the length of time the property is on the market as well as the expectancy amongst homeowners in their respective communities – so long as their home is priced in accordance with the current market value.

#### REPORT GLOSSARY

REMAINING INVENTORY: The total number of homes available at the close of a month.

DAYS ON MARKET: Measures the number of days a home is available on the market before a purchase offer is accepted.

LUXURY BENCHMARK PRICE: The price point that marks the transition from traditional homes to luxury homes.

NEW LISTINGS: The number of homes that entered the market during the current month.

PRICE PER SQUARE FOOT: Measures the dollar amount of the home's price for an individual square foot.

SALES RATIO: Sales Ratio defines market speed and determines whether the market currently favors buyers or sellers. A Buyer's Market has a Sales Ratio of less than 12%; a Balanced Market has a ratio of 12% up to 21%; a Seller's Market has a ratio of 21% or higher. A Sales Ratio greater than 100% indicates the number of sold listings exceeds the number of listings available at the end of the month.

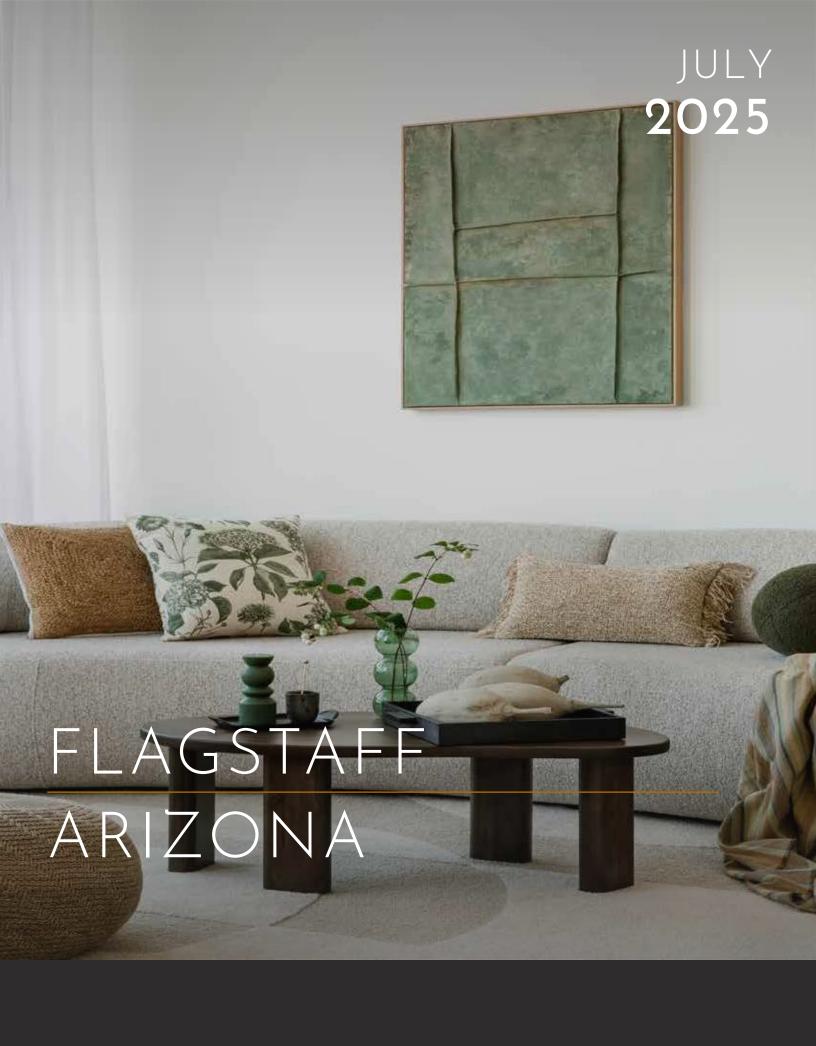

SP/LP RATIO: The Sales Price/List Price Ratio compares the value of the sold price to the value of the list price.

# LUXURY RESIDENTIAL MARKETS

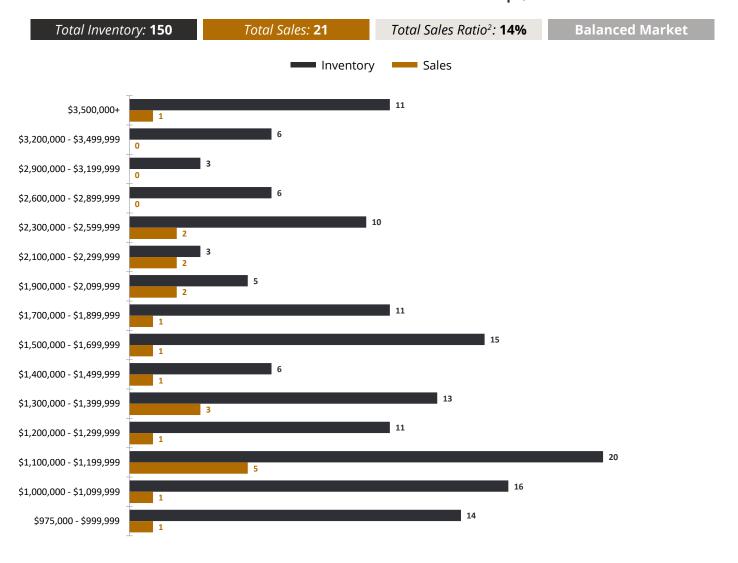

he Luxury Market Report is your guide to luxury real estate market data and trends for North America.

Produced monthly by The Institute for Luxury Home Marketing, this report provides an in-depth look at the top residential markets across the United States and Canada. Within the individual markets, you will find established luxury benchmark prices and detailed survey of luxury active and sold properties designed to showcase current market status and recent trends. The national report illustrates a compilation of the top North American markets to review overall standards and trends.

Luxury Benchmark Price 1: \$975,000
