

4079 SUNRIDGE ROAD

PEBBLE BEACH | LISTED AT \$2,500,000

Immaculate, impeccable, private, and true to its roots is how I would describe this remodeled mid-century modern home located in Central Pebble Beach. Once a diamond in the rough, it is obvious the work done to this home over the years has been a labor of love. The fully fenced park-like yard is private and secure and isolates you from your surroundings with lush drought resistant landscaping. There are several patios and a fabulous gas fire pit making it ideal to entertain. High end designer touches are abundant throughout this home, but you will have to pay attention to catch them all as they were done in a manner to keep the 1953 soul of this home alive and bring it up to today's standards. The living room has a fireplace and along with the formal dining room, has staggered width plank hardwood floors and open beam ceilings. Each is light and bright with two walls of glass allowing natural light to come in and bathe the interior. The kitchen has been updated as well with modern appliances, new designer mosaic countertops and back splashes, and features an old school pass through to the dining room. The spacious master suite has hardwood floors, a door to a patio area and a spa like bath with radiant heat, dual vanities, and a step-down Roman tub, and shower. There are two more spacious bedrooms, each with hardwood floors, a remodeled hall bath with a large vanity and a powder room. Additional amenities include a large pantry that also serves as a laundry/mud/powder room, a wine bar, the cleanest two-car garage you may ever see, and a 2-car carport. If you are looking for white on white on white "new" modern home, this one may not be for you, but if you want an impeccable mid-century modern home with old school style and charm without the hassles of a 70-year-old home, add this to your short list.
