Report Section			
	Active Listings (Supply)		The Active Listings chart shows the historical trend of how many listings were active each month. The Seasonally Adjusted Current Supply Index is a gauge that shows as of the end of last month, if there was more or less inventory available than the historical average. This can help show if the buyers or the sellers have more strength in a given market.
	Sold Listings (Demand)		The Sold Listings chart shows the historical trend of how many listings were sold each month. The Seasonally Adjusted Current Demand Index is a gauge that shows as of the end of last month, if there was more or less Sales than the seasonal historical average. This can help show if the buyers or the sellers have more strength in a given market.
	Supply vs Demand		The Months of Supply/Absorption rate chart shows the inverse relationship of how many sales happened each month compared to how many active listings existed for that month. The Seasonally Adjusted Supply vs Demand Relative Strength looks at the supply vs demand and compares it to historical values for the same season. How far off of center that number falls can help show if the buyers or the sellers have more strength in a given market.
	Supply vs Demand - Monthly Breakdown		This detail grid shows the numbers that are resented in the charts and gauges included in the reports for the last 12-month period.
General			
	Months of supply	MOS	The number of active listings compared to the number of sold listings for the same period of time.
	Seasonally adjusted		The value is compared only to the average value for the same month in prior years.
Calculation			
	Demand Index		How strong the amount of demand is compared to seasonally adjusted historic norms. A value of 50% means the number is in line with the historic norm, whereas a higher or lower value is comparatively more or less demand respectively.
	Mos of Supply Index	Months of Supply Index	The supply index measured against the demand index and compared to historic norms. This is an indicator of a buyers or sellers market. A value of 50% means the number is in line with the historic norm, whereas a higher or lower value is comparatively buyers market or sellers market respectively.
	Supply Index		How strong the amount of supply is compared to seasonally adjusted historic norms. A value of 50% means the number is in line with the historic norm, whereas a higher or lower value is comparatively more or less supply respectively.
